

# Steer Clear of Pollutants

Pollutants such as oil, gas, automotive fluid, soapy water, and undertreated sewage make their way to our waterways through storm drains and ditch systems. All of our waterways in Cuyahoga County eventually make their way to Lake Erie.

Help keep our waterways clean by not disposing of household chemicals, cooking oils, pet waste, tires, automotive fluids and yard waste in storm drains, ditches and streams.

**Only Rain Down  
the Storm Drain!**
