

MESIC WOODLAND EDGE

seed packet

Have a shady spot in your yard and don't know what to do with it? This Mesic Woodland Edge packet is perfect for that area where you don't think anything will grow. All of the species in this mix are native to Ohio and are commonly found on woodland edges and in open meadows. Lower light levels are welcome. Performs well in areas that are not too wet or dry.

Grasses	
Virginia Wild Rye	<i>Elymus virginicus</i>
River Oats	<i>Chasmanthium latifolium</i>
Nodding Wild Rye	<i>Elymus canadensis</i>
Whitegrass	<i>Leersia virginica</i>
Wood Reed	<i>Cinna arundinacea</i>

Riddell's Goldenrod	<i>Solidago riddelli</i>
Wild Bergamot	<i>Monarda fistulosa</i>
Black-Eyed Susan	<i>Rubeckia hirta</i>
Sweet Joe Pye	<i>Eupatorium purpureum</i>
Wild Red Columbine	<i>Aquilegia canadensis</i>
New England Aster	<i>Aster novae-angliae</i>

Seed packets contain 1 PLS (Pure Live Seed) oz. of seed which is enough to cover 250 square feet. This mix of native grasses and wildflowers typically grows to a height of 3 to 5 feet. Please note that each site is unique and that several factors can affect overall height. These factors include sunlight, hydrology and overall soil health.

The native perennials in your mix do require some patience to establish, but for instant gratification, consider adding some quick establishing annuals.
