

MESIC WOODLAND EDGE

seed packet

Have a shady spot in your yard and don't know what to do with it? This Mesic Woodland Edge packet is perfect for that area where you don't think anything will grow. All of the species in this mix are native to Ohio and are commonly found on woodland edges and in open meadows. Lower light levels are welcome. Performs well in areas that are not too wet or dry.

Grasses	
Virginia Wild Rye	<i>Elymus virginicus</i>
River Oats	<i>Chasmanthium latifolium</i>
Nodding Wild Rye	<i>Elymus canadensis</i>
Whitegrass	<i>Leersia virginica</i>
Wood Reed	<i>Cinna arundinacea</i>
Wildflowers	
Ox Eye Sunflower	<i>Heliopsis helianthoides</i>
Partridge Pea	<i>Chamaecrista fasciculata</i>
Purple Coneflower	<i>Echinacea purpurea</i>
Common Milkweed	<i>Asclepias syriaca</i>
Dense Blazingstar	<i>Liatris spicata</i>
Yellow Coneflower/ Grey-Headed Coneflower	<i>Ratibida pinnata</i>
Brown-Eyed Susan	<i>Rudbeckia triloba</i>
Riddell's Goldenrod	<i>Solidago riddelli</i>
Wild Bergamot	<i>Monarda fistulosa</i>
Black-Eyed Susan	<i>Rubeckia hirta</i>
Sweet Joe Pye	<i>Eupatorium purpureum</i>
Wild Red Columbine	<i>Aquilegia canadensis</i>
New England Aster	<i>Aster novae-angliae</i>

Seed packets contain 1 PLS (Pure Live Seed) oz. of seed which is enough to cover 250 square feet. This mix of native grasses and wildflowers typically grows to a height of 3 to 5 feet. Please note that each site is unique and that several factors can affect overall height. These factors include sunlight, hydrology and overall soil health.

The native perennials in your mix do require some patience to establish, but for instant gratification, consider adding some quick establishing annuals.

RAIN GARDEN

seed packet

The Rain Garden native seed mix is composed of native grasses and wildflowers that can tolerate wet events and dry areas based on season and the amount of rainfall. Also filters stormwater runoff. The mix contains grasses, grass-like species and wildflowers. Beneficial and beautiful, the Rain Garden creates diverse color and is attractive to butterflies and hummingbirds.

EASTERN GREAT LAKES NATIVE POLLINATOR seed packet

Bring back the pollinators with a mix especially designed for Ohio, Indiana, Western Pennsylvania and Western New York. Mostly Wildflowers, this mix is designed to give pollinators a place to stop all season long and are regionally adapted and open pollinated. We've partnered with The Xerces Society and this neonicotinoid and pesticide free mix has their seal of approval.

The native perennials in your mix do require some patience to establish, but for instant gratification, consider adding some quick establishing annuals.

BUTTERFLY/HUMMINGBIRD

seed packet

It doesn't get better than this mix for attracting butterflies and hummingbirds. The three different species of milkweed contained in this mix are host plants for the migrating Monarch butterfly. Watch in amazement as they complete their life cycle on these plants and use them as a source of nectar. Hummingbirds will love the bright colors and tubular flowers. The grasses contained in this packet add structure and diversity. Perfect to get kids involved!

Grasses and Grasslike	
Little Bluestem	<i>Schizachryium scoparium</i>
Nodding Wild Rye	<i>Elymus canadensis</i>
Side-oats Grama	<i>Bouteloua curtipendula</i>
Wildflowers	
Ox Eye Sunflower	<i>Heliopsis helianthoides</i>
Purple Coneflower	<i>Echinacea purpurea</i>
Swamp Milkweed	<i>Asclepias incarnata</i>
Dense Blazingstar	<i>Liatris spicata</i>
Black-eyed Susan	<i>Rudbeckia hirta</i>
New England Aster	<i>Aster novae-angliae</i>
Butterfly Milkweed	<i>Asclepias tuberosa</i>
Wild Bergamot	<i>Monarda fistulosa</i>
Common Milkweed	<i>Asclepias syriaca</i>
Hollow Joe Pye	<i>Eupatorium fistulosum</i>
Smooth Aster	<i>Aster leavis</i>
Rattlesnake Master	<i>Eryngium yuccifolium</i>
Foxglove Beardtongue	<i>Penstemon digitalis</i>

Seed packets contain 1 PLS (Pure Live Seed) oz. of seed which is enough to cover 250 square feet. This mix of native grasses and wildflowers typically grows to a height of 3 to 5 feet. Please note that each site is unique and that several factors can affect overall height. These factors include sunlight, hydrology and overall soil health.
