

## **Cuyahoga County Healthy Urban Tree Canopy Program PY 2025**

### **RFP Q&A Document**

**Last Updated: 11/25/2025. \*\*New responses begin on page 4.\*\***

**AMENDMENT** – Remove Parma from Tree Planting Scope of work on page 1 of Exhibit A.

**Question** – Are there deer protection specifications?

**Answer** – 4" diameter x 48" length rigid plastic mesh tree guards should be installed on all trees.

**Question** – The Tree Planting Specifications indicate that the mulched radius around planted trees should be 8 feet. Is this correct?

**Answer** – The radius of the mulched area around planted trees should be 4 feet, unless otherwise obstructed (by curbs, sidewalks, etc).

**Question** – The Tree Planting Specifications indicate the removal of **all** wire and burlap from the root ball of B&B trees. This seems to contradict nursery industry standards. What are these specifications based on?

**Answer** – These planting specifications, including the removal of all wire and burlap from the root ball, are based on the Ohio Tree Planting Specifications as provided and endorsed by the Ohio Division of Forestry.

**Question** – How is the warranty handled if watering is contracted through a different contract/vendor than the tree planting?

**Answer** – Whoever is performing the watering task will be required to keep and submit a watering activity log indicating dates and methods of watering. In the case of a different vendor performing the watering than the planting, if watering was satisfactorily completed and the tree fails, the replacement will be the responsibility of the planting contractor. If not, it will be the responsibility of the watering contractor.

**Question –** Will the Tree Acquisition and Planting Activities projects require prevailing wage rates to be paid to laborers?

**Answer –** No, prevailing wage will not be required for any of the projects.

**Question –** is it possible to submit a proposal for just one line time (watering, for example).

**Answer –** Yes.

**Question –** For planting projects, would water be available on site (or nearby) for refilling water tanks?

**Answer –** We will request/require that municipalities make water available, likely at the service yard or similar location, etc. For projects with non-municipal organizations, we will likewise request that they provide a water source or work with their community to do so.

**Question -** What would we be required to track for 3 years post planting/watering?

**Answer -** Tracking beyond the first year will be the responsibility of the sponsoring community/organization. Items to be tracked include survival and a maintenance/watering log.

**Question –** For the Rocky River Planting project, can you provide stated “Diagrams” listed in the “Tree Activity Form” for Rocky River?

**Answer –** Yes, it is appended to the end of this document.

**Question –** For the Rocky River Planting project , what type of site access / parking would be available to us? i.e. Distance from access/parking to trees being planted.

**Answer –** See the diagram attached in response to the previous question.

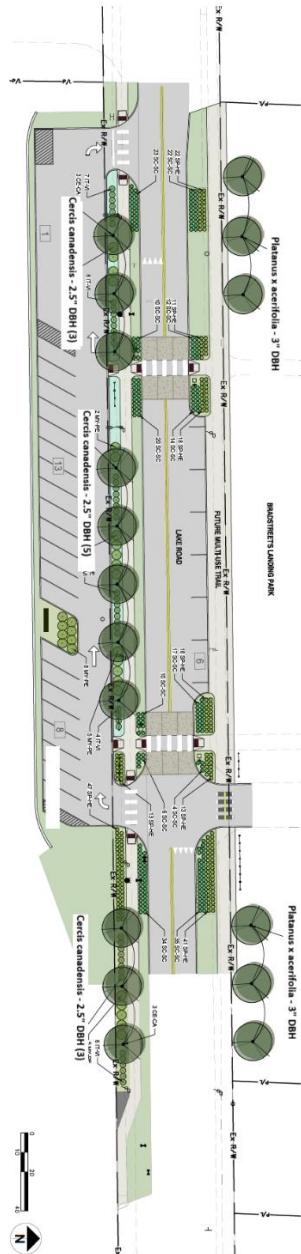

**Question –** For the Rocky River Planting project , listed on the “Cost Proposal Form” the *Platanus* are 2 – 2.5”, and the *Cercis* are 1 – 1.5”; however, on the “Tree Activity Form” they are listed as 3” and 2.5” respectively. Which is Correct?

**Answer -** The Tree Activity Form is correct (3" and 2.5").

**Question –** For the Urban Forestry Planning projects, how many trees should be considered for the inventory?

**Answer -** For MetroWest CDC and Ohio City Inc, the number of trees is up to 2000. For Slavic Village Development, the number of trees is up to 250.

### **Rocky River Planting Diagram:**

## 11/24/2025 Q&A Document Updates

**Amendment** – The Cost Proposal Form for Tree Planting Activities has been updated to correct the total number of trees for First Year Watering for the City of Lakewood (Line P52) and Dunham Tavern (Line P115). The updated excel spreadsheet is now live on <https://cuyahogaswcd.org/hutc/> or may be accessed by [clicking here](#). This updated form includes updates to tree sizing for the City of Rocky River included in the initial Q&A document dated 11/21/2025.

**Question** – For the following maintenance sites, what type of site access / parking would be available to us? i.e. Distance from access/parking to trees being treated.

1. Rocky River (see diagram at the end of this document)
2. Doan Brook Watershed Partnership – on-street and on-site parking throughout Rockefeller Park.
3. Slavic Village Development – on-street and on-site parking.
4. University Circle – this is primarily Wade Oval and surrounding properties. There is access to on-street parking, local lots, and access across lawn areas.

### **Answer-**

1. Rocky River - see diagram at the end of this document
2. Doan Brook Watershed Partnership – on-street and on-site parking throughout Rockefeller Park.
3. Slavic Village Development – on-street and on-site parking.
4. University Circle – this is primarily Wade Oval and surrounding properties. There is access to on-street parking, local lots, and access across lawn areas.

**Question** – Would water be available on site (or nearby) for refilling treatment tanks?

1. Rocky River
2. Doan Brook Watershed Partnership
3. Slavic Village Development
4. University Circle

**Answer** – Similar to the planting sites, we will request/require that municipalities make water available, likely at the service yard or similar location, etc. For projects with non-municipal organizations, we will likewise request that they provide a water source or work with their community to do so.

**Question** – Can you provide clear descriptions and desired outcomes for specialized treatments such as bio-aeration, rootzone decompaction, soil enhancement, soil remediation, root invigoration, root collar excavation, organic root feeding, prescription fertilization, and potassium phosphite application? (e.g., definitions, methods, materials, areas to be treated)

1. Rocky River
2. Doan Brook Watershed Partnership
3. Slavic Village Development
4. University Circle

**Answer** – We are not able to provide more detailed/specific information than what is provided within the timeframe of the RFP. Please include any assumptions associated with your cost in the “Notes/Comments” column of the bid form, or in a proposal cover letter.

**Question** – Can you provide more detailed information about the trees being treated at each site? (e.g., DBH, size classes, locations, species, treatment rates, etc.)

1. Doan Brook Watershed Partnership
2. Slavic Village Development (The bid alternate already has this information)
3. University Circle

**Answer** - We are not able to provide more detailed/specific information than what is provided within the timeframe of the RFP. Please include any assumptions associated with your cost in the “Notes/Comments” column of the bid form, or in a proposal cover letter.

**Question** – What would we be required to track for 3 years post treatment?

1. Rocky River
2. Doan Brook Watershed Partnership
3. Slavic Village Development
4. University Circle

**Answer** – Vendors will be required to track treatments only during the contract term.

**Question** – Can you provide stated “Diagrams” for “Area A” and “Area B” located in the “Tree Activity Form” for Rocky River?

**Answer** - see image inserted below.

**Question** – For Slavic Village, can a partial bid be placed? Can a bid be placed on treatments M29, M30, M31, M32, and M34 (leaving out M33)?

**Answer** – Yes.

**Question** – For Slavic Village, what pests and/or diseases are being controlled?

**Answer** – Mites and other insect pests.

**Question** – Can a partial bid be placed? Can a bid be placed on treatments M37, M38, and M39 (leaving out M40)?

**Answer** – Yes.

**Question –** For Newburgh Heights, can you provide more details on the trees being pruned (similar to Shaker Heights)? DBH and heights of all trees individually? Locations of trees? Tree Species?

**Answer –** Yes, the Tree Activity Form was inadvertently left out of the RFP. It is appended to the end of this document.

**Question –** Are there any bid bonds required for any of the proposals.

**Answer –** No.

**Question -** Can I submit a proposal for professional services in which I source specified tree species from various nurseries and then visit the specified nurseries and tag them for purchase by the contractor, municipality or CWSCD?

**Answer -** Yes, in this case use the "Community Coordination and Admin" lines on the bid form, and write these specific services in the "Notes/Comments" column. While we are unlikely to contract for this if the vendor selected for tree planting has an arborist on staff that can perform these services, there may be situations where this would make sense for us.

**Question -** Is a project area GIS data set/map available for Metro West CDC and Ohio City, Inc. non-ROW locations and acreage?

**Answer –** We are not able to provide more detailed/specific information than what is provided within the timeframe of the RFP.

**Question -** Will the composite score be the sole criterion for each planting site when applying the USI methodology to the Metro West CDC inventory?

**Answer –** While this is the sole required criterion for the purposes of this RFP, other criteria may be incorporated at the discretion/suggestion of the selected contractor. These details can further be worked out and negotiated after selections have been made.
